

FEEDBACK FROM BUSINESS REVIEW PARTICIPANTS

We appreciate when our clients will share their thoughts. Below are just a few of the comments that we have received from individuals that experienced Newport's upfront peer organizational review.

- As the newest member of the team I found the sessions the perfect opportunity to gain a better perspective on the business, specifically where it is now and plans for the future. I didn't know that much about the early years, so I enjoyed learning about both the struggles and the successes.
- thought about the big picture regarding where I enjoy spending my time personally and where I would like my life to be in 3 years
- provoked me to think about what is working in the business and the future vision of the company
- It was informative, stimulating and fun to have the opportunity to be in same room and share stimulating and well directed "mental energy" for approximately a day with my family
- Provided good insight into everyone as a person and a business colleague
- It confirmed that this team is very open to the change and wants to make the company even better.
- I have a stronger sense of commitment, loyalty and support from my colleagues.
- Learned what running a business takes (i.e. thinking "entrepreneurially")
